

Eazi Access Radiator Casing

Practical access. Professional finish. Everyday durability. Eazi Access enables efficient maintenance, cleaning and servicing without removing the entire casing, reducing downtime and labour while maintaining robust steel protection.

Applications

- Education facilities
- Healthcare environments
- Residential and social housing
- Commercial and public buildings

Construction & Configuration

- Fabricated mild steel casing
- Slotted or perforated ventilation options
- Durable polyester powder-coated finish (RAL colour as specified)
- Floor-standing or wall-mounted configurations
- Manufactured to suit site-specific dimensions

Access & Performance

- Hinged or removable front panel for controlled maintenance access
- No full casing removal required during servicing
- Designed to maintain effective airflow and heat output
- Heat output independently tested by BSRIA to BS EN 442-2

Specification Summary

Range	Eazi Access Radiator Casing
Material	Casing fabricated from mild steel.
Ventilation	Slotted or perforated ventilation panels as specified.
Finish	Polyester powder-coated finish, RAL colour as specified.
Mounting	Wall-mounted or floor-mounted configuration.
Access	Hinged or removable front panel providing controlled service access without full casing removal.
Dimensions	Manufactured to suit project-specific sizes and pipework arrangements.
Performance	Ventilation designed to maintain effective heat output. BSRIA independently tested to BS EN 442-2.
