

# Coverwall Hygienic Wall Cladding

 Coverad

**Datasheet**  
Specification Summary

**A clean, durable wall cladding system for healthcare, education, washrooms, corridors and other hard-working interiors.**

## Overview

Coverwall is a hygienic PVC wall cladding solution supplied by Coverad for projects that need a smart, wipe-clean and durable finish.

It is designed for use in interiors where appearance, hygiene and long-term practicality matter - including healthcare support spaces, education settings, washrooms, changing areas, kitchens, utility rooms and commercial back-of-house areas.

Installed with adhesive and finished with trims or sealant, Coverwall helps create a smooth finished surface with a professional appearance.

*Coverwall sheet material*

## Key features

## Accessories & profiles

Coverwall is supported by a practical range of trims and finishing accessories to help achieve a neat, professional installation.

*Profiles shown include H profile, J profile, external angle, F profile, internal angle and internal corner / covered detail.*

<p><b>H profile</b></p> <p>Used for tidy sheet-to-sheet joints where two boards meet on the same plane.</p>	<p><b>J profile</b></p> <p>A finishing trim for exposed edges and perimeter terminations.</p>
<p><b>External angle</b></p> <p>Designed to finish outside corners cleanly and help protect vulnerable edges.</p>	<p><b>F profile</b></p> <p>Useful where the sheet meets another surface or return detail.</p>
<p><b>Internal angle</b></p> <p>Creates a neat internal corner detail for wall junctions.</p>	<p><b>Internal corner / covered detail</b></p> <p>Suitable where a smoother, more hygienic corner transition is required.</p>

Coverad can help quote the correct accessory package alongside the cladding sheets so the order is more complete from the outset.
